Jagram

is a unique company,
difficult to compare
with any other

For example, we believe that success in business can be combined with family life and the pursuit of passions. We also believe that this can be achieved through a work ethic that benefits everyone, be it customers, business partners or employees (not forgetting of course ingenuity, intelligence and hard work). We recognize that this requires constantly learning and respect for the natural and social environment.

In practice, we honestly strive to supply our customers with best products at best conditions, for employees our attitude means no long working hours, and the chance to enjoy free weekends, while for suppliers it means they are paid on time. The company also fulfills all its obligations, pays its taxes, earmarks a significant budget for further training of its team members, and maintains good, long-term relations with business partners. It also means that the company renounces the now widespread use and importing of goods, materials and raw materials that are harmful to the environment and people, despite the potential profitability of such activities.

Quality & craftsmanship

We are garden wood specialists with over 30 years of professional experience; we love working in wood and creating beautiful, functional and durable products. We are proud to have earned ISO, FSC, PEFC and ITB certificates and supply our customers with products of the highest quality.

Rest assured
you have a 10yr guarantee
against rot with all
of our products.*

Your product will
never need treating.
No further
maintenance required.

Made from wood
sourced from
responsible forestry.
„Look for FSC®
certified products“

All Jagram products have been designed
and manufactured to the highest standards.
The entire range is manufactured using
european timber from responsibly managed forests.
FSC® certification available on request.

Glulam Curves

ecocurves
Bespoke Timber Arches

www.ecocurves.co.uk

Jagram is one of Europe's leading manufacturers of glued laminated timber curves. In the last 30 years we have tested most of the world's leading glue, machinery and tool brands, adding our own patented solutions to create a technologically unique production process - our factory computers and machines will turn timber laths into laminated curves of the most elaborate shapes in just 40 minutes. If you are looking for a bespoke product - we are the best choice there is.

Leisure Collection

To create our loungers collection we invited the best designers and timber engineers to focus on ergonomics as well as the visual effect. As a result it combines luxury and comfort to enhance any standard décor, lending it an exclusive, unique appearance. They are also featuring quality, weatherproof, European made, shape adjusted cushions.

Decoration and plants not included

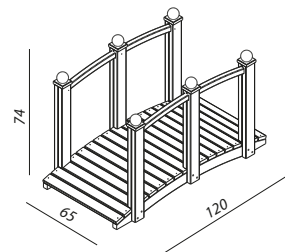

BECOMING A GARDENER

Planters are the perfect products to create an unforgettable space in your garden. Plant some flowers in the pots and enjoy the view. This way of arranging your garden is also perfect for people who get bored easily or just enjoy changing things up. The planters can be moved easily without damaging the roots of the plants. If you choose a planter with trellis, another advantage is the possibility to shield your garden from the neighbours – the attached trellis are perfect for climbing plants to ensure privacy.

Wooden products combine perfectly with the greenery and they don't distract the eyes from the beauty of the plants, merely complementing them.

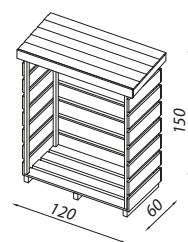

Oslo Planter

50907 74 x 120 x 65

- with practical worktop and useful shelf
- easy to assemble

10870 24 x 120 x 120

- rough sawn 15 x 120 mm boards
- assembly without tools

What if you don't have a garden?

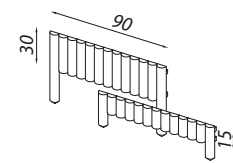

Those who don't have a piece of land, but would like to grow vegetables and herbs, can set up a planter on their balcony or terrace. Growing vegetables on a small scale in your own terrace has been spreading across Europe for several years.

Our GrowyourOwnline (as seen on pages 12-14) allows you to become a gardener without a traditional garden. Our Provence Planter is equipped with wheels for easy movement, lined with a water-resistant material and has its own innovative drainage system. This way, neither water nor the soil comes into direct contact with the wood, which provides greater longevity of the product. Raised planters are also an ideal product for the elderly, as the care of plants doesn't require frequent bending over. The planters can be used to grow your own herbs, spring vegetables and even strawberries, tomatoes, cucumbers or zucchinis, to create the perfect eco-garden.

Wooden Garden Trellises

a wooden trellis is an ideal surface for plants to climb on and it makes for a perfect partition to create an intimate space

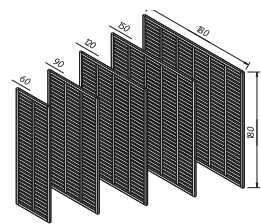

Garden trellises are perfect for supporting climbing plants, but that's only one of their many advantages. They provide an easy way to alter the look of your garden, terrace or even balcony. Moreover, you can install trellises to isolate the space from neighbours, block and unsightly view or to create an intimate area that makes one feel more at home.

How to choose the best trellis to suit your space? Keep in mind the various densities, as they may be useful for different purposes. For climbing plants, grilles with larger openings are more convenient, but if the trellis is to act as a partition, opt for denser ones. For a more modern feel, choose trellis with horizontal, dense sections between narrow openings, or go with the traditional version with square sections set at different angles. Installing well-chosen trellises can effortlessly make your leisure space more attractive and arrange it to suit your taste.

The Rose Arch is a truly beautiful wooden garden arch with English trellis panel sides that will enable you to enhance your garden vertically. Plants can be trained to climb up and around this wooden arch creating a beautiful focal point over a path or walkway.

The Olimpia Arch is a classic garden arch that will become a beautiful focal point within your garden. Plants can be trained to climb the trellis side panels creating a stunning floral arch that will compliment your garden path or alternatively you can use this wooden arch to make an attractive entrance to your garden.

Pavilions

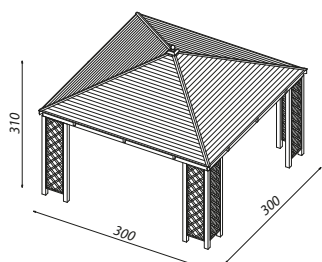

- roof tiles available in either black or green.
- floor sold as an option.
- oslo trellis panels available as an option

The tiled Rimini Entertaining Gazebo features a heavy-duty, handmade diamond trellis, providing an airy spacious area in which to relax with friends and family. This large outdoor entertaining space will easily accommodate a large table and chairs or fit nicely above a hot tub area.

| 41500 | 310 x 300 x 300 |
| 41510 | 310 x 300 x 400 |
| 41505 | 310 x 400 x 400 |

NAPOLI

- modern minimalistic design
- solid pressure treated timber frame
- heavy-duty waterproof canvas.

An attractive gazebo with a modern minimalist design. Lightweight but sturdy and stable structure that can be easily moved when needed. Climbing plants will grow quickly on the corner trellis, creating a fabulous effect.

Certificates

Jagram pays great attention to effective quality management and its compliance with the requirements of the European Union, both in terms of high quality of wood from which our products are made as well as environmentally conscious production system. Our wood comes from European forests certified according to the FSC (Forest Stewardship Council®) or PEFC principles on responsible forest management. Our factory has been awarded the ISO 9001 certification which ensures the highest quality of services. Joining the certification program is expensive and requires a lot of effort from Jagram, but it undoubtedly gives us and our customers many benefits:

- facilitates an increase in the level of customer service,
- streamlines management, resulting in lower costs and better prices,
- positively affects the perception of the Jagram brand,
- sets a standard for the competition to source the wood sustainably.
